Skills

OS

GNU/Linux, Windows

LANGUAGES

C/C++, Python, TypeScript, BASH, R

FRAMEWORKS

Flask, Node.js, TensorFlow, PyTorch, scikit-learn, Keras

DATABASES

MySQL, Milvus, MongoDB

TOOLS

Git, Vim, Kaldi, SpeechBrain, Wavesurfer, Markdown

Coursework

Data Structures & Algorithms

Linear Algebra, Discrete Mathematics

Advanced NLP, Speech Analysis

Speech-to-Speech Machine Translation

Operating Systems, Comp. Linguistics

Education

2020–2024

IIIT HYDERABAD

B.Tech + M.S in Computational Linguistics

2018–2020

KPC JUNIOR COLLEGE, KHARGHAR

Percentage: 81.3%

2017–2018

DAV INTERNATIONAL, KHARGHAR

Percentage: 94.8%

Projects

2023–2024 **Stylr**

Python Dev, Computer Vision, Web Dev, ML

Developed a fashion-apparel shopping app that recommends outfits based on users' wardrobes, featuring a Tinder-style interface. Built with MERN stack and hosted on Heroku. The Apparel Recognition Model (AppReMo) was trained on the Flipkart 500K dataset to detect apparel type and color.

2023–2024 **Digit Recognition**

Deep Learning, Speech Processing

Created an ASR system to recognize spoken numerals in English and generate their Hindi textual and audio equivalents using a Machine Translation + TTS pipeline.

2020–2024 **Other Projects**

- **Canteen Portal:** MERN-based web app to track real-time canteen orders and transactions.
- **LSTM Blogs:** Authored a blog series analyzing RNNs, LSTMs, and sequence modeling performance.
- **C Shell / Xv6:** Implemented custom syscalls for process scheduling, I/O management, and networking.
- **Text Style Transfer:** Reproduced results from "Text De-toxification using Large Pre-trained Neural Models."

Experience

MAR'25 – JUN'25 **ML Engineer Intern – MIVI**

Built an agentic framework for cab booking through Uber and Ola using speech recognition. Implemented in LangGraph and integrated into Mivi's marketing product, enabling interactive voice-based ride booking and increasing brand visibility.

DEC'23 – OCT'24 **DL Intern – Proxzar**

- Designed a reverse image search engine.
- Built a universal document converter using Docling for converting DOCX, PDF, PNG, XML, ASCIIDOC, and other formats to JSON for dataset generation and querying.

JUN'24 – AUG'24 **Core Researcher – Subtl.ai**

Developed a question-generation and recommendation feature for uploaded documents and integrated it with the existing API stack.

2022–2024 **Teaching Assistant x4 – IIIT Hyderabad**

Assisted in courses: Language and Society, Introduction to Linguistics, Speech Analysis, and E-MSIT.

Publications

2026 (UNDER REVIEW)

Detecting Convolutional Codes Via a Markovian Statistic

Submitted to IEEE WCNC 2026 Conference
